Professional Summary

B.Tech CSE student with strong foundations in Full-Stack Development, DSA. Proficient in building scalable websites using HTML, CSS, React.js, Node.js, MongoDB, and JavaScript with a focus on clean, maintainable code.

Technical Skills

Languages: Python, JavaScript, TypeScript, C++, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, React Native, MongoDB, REST APIs

Developer Tools: Git, GitHub, VS Code, Postman, Docker, DBMS, Operating Systems, SDLC

Additional Skills: Data Structures & Algorithms, Object-Oriented Programming, System Design, API Development, Database Design

Soft Skills: Teamwork & Collaboration, Effective Communication, Problem-Solving, Time Management, Adaptability, Leadership, Critical Thinking

Education

Maharana Pratap Engineering College, Kanpur [2023 – Present]

B.Tech in Computer Science and Engineering CGPA: 8.2/10.0

CC Inter College, Kanpur [2022]

Intermediate (12th) Percentage: 64%

OND Public School, Kanpur [2020]

High School (10th) Percentage: 75%

Projects

NexusHub — Social Networking Platform 🔄 [2026 – Present]

Tech Stack: React.js, Redux Toolkit, Material UI, Node.js, Express.js, MongoDB, JWT

- Architected a full-stack social networking platform using the MERN stack with Redux Toolkit for state management, Material UI for responsive design, and dark mode support across all views.
- Implemented JWT authentication with role-based authorization, bcrypt password hashing, rate limiting, and centralized error handling middleware to ensure secure and reliable API endpoints.
- Engineered real-time notifications, an analytics dashboard for engagement tracking, advanced search with pagination, and optimized MongoDB indexing strategies for high-performance data retrieval.

Task Management Application 🔄 [2026]

Tech Stack: Node.js, Express.js, JavaScript, JWT, bcrypt, REST APIs

- Built a full-stack task management application with a RESTful API backend using Node.js and Express.js, implementing secure user registration and login with JWT authentication and bcrypt password hashing.
- Designed role-based access control with admin and user permissions, including protected task CRUD operations and an admin-only endpoint for viewing shared user locations across the platform.
- Structured the codebase using MVC architecture with modular route controllers, centralized error handling, input validation, and deployed the application on Render for production accessibility.

Certifications

- **Programming with Generative AI - NPTEL** ➡
- **Python Development Internship - Pinnacle Labs** ➡
- **Software Engineering Virtual Experience - Forage** ➡
- **TCS iON Career Edge Young Professional** ➡

Achievements

- Completed Python Developer Internship at Pinnacle Labs, delivering optimized backend solutions, automated API workflows, and reducing manual processing time by 30%.
- Solved 200+ DSA problems on LeetCode and GeeksforGeeks, achieving consistent improvement in algorithmic problem-solving speed and efficiency.
- Participated in strategic mind games (Chess) and team sports (Cricket), developing analytical thinking, decision-making, and teamwork abilities.
